Download >>> <http://bit.ly/2NEjlsf>

## About This Game

Serment - Contract with a Devil (or Serment, for short) is a visual novel - dungeon crawler hybrid where you play as a girl who was revived by a beautiful devil.

Though, instead of claiming our heroine's ever so cliché human soul, the devil demands a huge sum of money for payment. If the payment comes even one day late, the heroine's soul will return to the afterlife.

And so, her light-hearted, comedic adventure to save up enough money before the deadline begins.

*Despite the dark sounding premise, the majority of Serment will be light-hearted slice of life events (more commonly known as cute girls doing cute things).*

## Game features:

- Cute anime girls!
- 4 playable main characters, each with their own unique story and endings.
- More than 10 side characters, each with their own personalities and subplots.
- A dungeon crawler with manually designed puzzles and 100+ unique items to discover!
- A lot of cute anime girls!
- Turn-based RPG battles with simple mechanics but tons of depth.
- A detailed dating sim time management system.

- 
- Cooking, crafting and fishing minigames!
  - Light yuri (GxG) romance.
  - Steam Achievements and Trading Cards.
  - Did we mention that there will be cute anime girls?

a good game with beautiful art. Really nice gameplay, sharing the board with the opponent make things funny. pretty good but it seems some people use script?. This game turned out to be an odd one for me. I've rarely played one that navigated quite like this, and it genuinely has its creepy moments. Also, fairly intriguing story - someone did some very good writing on this. It's a bit clunky, but enjoyable! Well worth the price, and very good for what I'm sure is a first-ever game.. One of the best documentaries, if not the best, about indie games. Provides so much more depth than Indie Game: The Movie and is simply a great thing to watch if you want to feel excited about creating something yourself. I am proud to have been a kickstarter backer. The fact that certain idiots have targeted it only proves its importance and worth.

Another addicting Solitaire game.

You do not have the ability to replay one certain level to get a better score once the set is done. The only way to do this is to replay the level itself over and over until you get it perfect, or replay the whole set from the start of you have multiple non-perfects.

The hidden object portion of the game is really easy and if you get stuck you have the hint button that will fully recharge over a little time.

If you exit the game midpoint through a set, it will fail that level once you restart the game. So, if you do not want this to happen, make sure you are fully committed to playing all 10 rounds in the set before you exit the game.

Achievements are easy to get.. What's there to like? Build your own prehistoric fantasy village, raise an army and go pillage resources from other players. Be part of a tribe (why? as of this writing, tribe wars were not yet happening). Very similar to other building games.

Flip side of the coin: This is game where you have to be patient as build times are very long as you progress past the first few levels. Even if early in the game, the building upgrade only take several minutes, plan on waiting several days for some upgrades later on. Training an army that has a chance of defeating an opponent will also take, at times, an hour or more. Don't like waiting? You can use meteorites to speed up just about anything. Like other games of this style, you will have to spend some of your \$ to buy these, or you can slowly accumulate these during the game.

the Ugly: Very frequent in-game crashes, and limited support. The patches and upgrades seem to downgrade the game even further away from something playable. After playing for about 2 months, I suddenly found myself in a situation where the game has to re-connect as soon as it starts, and then it gets caught in a loop - reconnect/restart. No longer playable.. don't play this game lol. Unfortunately this is my first "not recommended" review. This "game" is awesome, very well polished and fun. However, it is a single mission and in my 17 minutes of play I managed to complete 3 separate playthroughs. This is more of a tech demo than a stand alone game. In under 20 minutes I've done it all, simply not enough content to warrant the price tag (\$1 a minute in my case). I have refunded for now but once this title has more content it will certainly warrant a purchase.. A great tribute to Paul Walker. If he were still alive I know he would love it.

#### **New update:**
